

17th European Congress of Clinical Neurophysiology

5-8 June 2019 **Warsaw**

Warsaw, May 22, 2018

Dear Colleagues,

We are pleased and honored to invite you to attend the **17th European Congress of Clinical Neurophysiology**, which will be held on 5-8 June 2019 in Warsaw, Poland.

With your invaluable contribution we aim to prepare a programme which would catch the most exciting new developments in all areas of clinical neurophysiology. The Congress would hopefully provide an opportunity to share the knowledge, exchange experiences, as well as stimulate further research and international cooperation.

The Congress main theme is: *SHAPING THE PRESENCE AND THE FUTURE OF CLINICAL NEUROPHYSIOLOGY.*

We are keen to involve all National Societies in the ECCN 2019. For this reason, we kindly ask you to collaborate with us by proposing a few (1-3) topics which in your opinion we should cover, either in research or practice areas; as well as recommending speakers from your own society or from others.

We would like all national societies to express their preferences and suggestions. However, please bear in mind that the final programme would be compiled by IASB and that ECCN budget limits the expenses for invited speakers.

Yours faithfully,

Prof. Maria Ejma

ECCN 2019 Warsaw LOC Chair

President of the Polish Society of Clinical Neurophysiology
